

# Parallèles – Review form

## Guidelines for reviewers/reviewing

We attach great importance to the reviewing process, which aims to ensure the quality of papers published, assist editors in making decisions and help authors improve their research. We kindly request that you keep these objectives in mind when writing your comments.

Please maintain a respectful tone and stick to the following principle: evaluate the product, not the person.

You can write specific comments directly in the Word file, in addition to filling out this review form. If you do so, however, please make sure that the [comments appear anonymously](#).

Thank you very much for your valuable contribution. We really appreciate your support.

## 1. Publication decision

- Paper is not recommended for publication. See comments below.
- Paper is recommended for major revision – a second submission followed by further peer reviews is advised.
- Paper is recommended for publication with changes as indicated.
- Paper is recommended for publication in its present form.
